

TREND MICRO™

# Internet Security<sup>2008</sup>

Powered by the PC-cillin Engine

## Stop Tomorrow's Threats Today

Trend Micro Internet Security 2008 makes it easy to protect your home network, personal identity, and online activities against viruses, spyware, identity theft and other present and future web threats. Confidently e-mail, shop, bank, or share photos online, knowing your privacy and files are well protected.

### What's New

#### Enhanced Behavior Monitoring/ Proactive Intrusion Blocking

A set of policies prevents suspicious changes from occurring in the first place, with a smaller number of pop-ups and less resource consumption.

#### Detect and Block Image Spam

Blocks spam that is in the form of images such as pornography or prescription drugs.

#### Worry-Free Click

Uses a Web Threat Protection framework to categorize and identify suspect URLs. If a URL in an email is from a known "bad" site, it prevents a user from clicking it. Available in CY2008 Q1.

#### Customizable Security Warnings

Set how often you want to be warned about security issues.

#### Security Activity Report

Shows security activities performed by the product. Shown to the user on a regular basis (the default is weekly).

### Features

#### Antivirus Security

Detects and removes viruses and the latest threats from your emails, Internet downloads, removable media and PCs. Automatic updates immunize your security system against the newest virus outbreaks.

#### Spyware Protection

Blocks and removes spyware, adware, grayware, and root kits that hide deep inside your computer.

#### Personal Firewall

Intercepts hackers and network viruses trying to attack your computer and home network.

#### Fraud Defense

Protects you from online phishing scams designed to steal credit card and bank account numbers. Configures easily and notifies you of the latest Web-site risk.

#### Wireless Network Monitoring

Safeguards against unauthorized users invading your wireless home network.

#### Home Network Control

Manages, configures and updates security for every PC on your network, with an easy-to-use management console.

#### Household License

Superior PC protection for up to 3 home or mobile computers.

#### Advanced Parental Controls

Parental Controls allow you to manage your children's internet activity by blocking Web sites and inappropriate content.

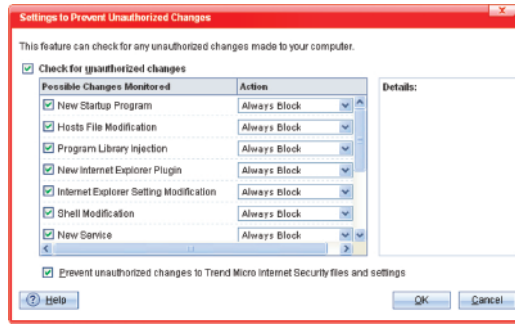

### System Requirements

- Windows Vista Home Basic, Home Premium, Business, or Ultimate
- Windows XP Home, Professional, Media Center or Tablet PC
- Pentium or equivalent 800MHz processor
- Intel Hyper-Threading and Dual Core processors supported
- 300MB of available hard disk space for installation
- 1024 x 768 (XGA) minimum display resolution

From this **Main Overview Console** page, you can update your virus pattern and conduct a system scan.

**Proactive Intrusion Blocking:** a set of policies prevents suspicious changes from occurring in the first place, with a smaller number of pop-ups and less resource consumption.

**Virus and Spyware Controls** allow you to customize some of your security settings, including **Exception Lists** and a spyware **Software History Cleaner**.
